PROFILE

SUMMARY · PER JOB

Product manager who owns the whole arc, from requirements and build to production, launch and the numbers after. At NOWN I was assigned by the CEO to run Veil end to end, a manufactured ceiling system that ships with its own software configurator, and I now own the ASOFT Carve launch. Four years across agency and in-house, so go-to-market is part of the product, not a hand-off. Trilingual (English, Arabic, French), and at my best with a lot in motion.

SELECTED WORK

3 PROOF POINTS · CHOSEN PER JOB

Veil: product + configurator

Owned a physical system and its digital configurator end to end: requirements, developer management, design → production, go-to-market.

Search & analytics audit

Found 83k monthly searches invisible to GA4, key conversion never tracked, ≈$7k wasted spend. Prioritised fixes, briefed devs, instrumented behavioural data.

Launch that moved demand

Staged omnichannel funnel for a new ASOFT colourway: +15% quote requests, ~+10% traffic, +8% / +5% audience growth.

EXPERIENCE

NOWN: Marketing & Brand Manager · Product Owner, Veil & ASOFT Carve

Jan 2025 – Present · Amsterdam

B2B design & architecture studio (acoustic surfaces). Reporting to the CEO.

BULLET ORDER + WORDING · PER JOB

- **Veil, end-to-end Product Manager** (assigned by the CEO): drove a ceiling/wall system from design through production while managing the developer building its configurator; wrote the requirements that kept engineering aligned and owned every prioritisation call and deadline through launch.
- **ASOFT Carve, Product Owner** (32 patterns × 33 finishes): built the launch operating system: PRD and OKRs, JTBD positioning, MoSCoW scope, RICE-prioritised launch waves, Stage-Gate plan, RACI/DACI decision rights, RAID log and AARRR metrics.
- **Audited site search (Algolia) and GA4:** surfaced untracked conversions, source-less traffic and a misconfiguration costing ≈$2k/month; wrote developer briefs, set a spend cap, set UTM governance, and instrumented click data so search re-ranks on real behaviour.
- Own brand strategy and EMEA positioning, including the rebrand; lead creative, web-dev and production teams; built and run the WordPress site; share budgeting with the CEO.

EMG: Account Executive

Sep 2023 – Jan 2025 · Amsterdam

- Managed a portfolio of global B2B clients in chemicals, energy and industrials, including Mitsubishi, OQ and Songwon.
- Stepped up above my title into budget allocation, utilisation tracking and pricing across accounts when my manager changed roles.
- Ran simultaneous trade-show and campaign deliveries against timelines and KPIs; post-campaign reviews fed strategy.

ChatLicense: Marketing & Content Specialist

Mar 2023 – Sep 2023 · Rotterdam

- Worked inside the development team on a pre-launch digital-literacy app; ran user testing in schools across the Netherlands and fed findings back into the product before launch.
- Built social and content strategy across LinkedIn, TikTok and in-app, driven by user insight and engagement data.

Earlier

2021 – 2023

- **Wright Brothers Flight Technology**, Marketing Executive: campaigns, events, post-campaign ROI analysis.
- **Joolz**, Branding & Communications: brand and visual communication for a premium design-led brand.
- **World Fair Trade Organization**, Social Media Intern: global digital campaigns.

SKILLS · MIRROR POSTING KEYWORDS

SKILLS & TOOLS

Product: roadmapping, PRDs and requirements, prioritisation (RICE, MoSCoW), user testing, JTBD, launch planning, stakeholder alignment (RACI/DACI)

Go-to-market: positioning, campaign management, content, CRM, budgeting and pricing

Tools: Notion, ClickUp, GA4, GTM, Algolia, Google Ads, SEMrush, HubSpot, MS Dynamics, WordPress, ActiveCampaign, Adobe CC, basic GitHub
