DID YOU KNOW?

**WE DELIVER
RIBA-ACCREDITED
CPD SESSIONS.**

Yes — alongside designing and manufacturing Simply Elevated architectural products to clients around the world, **NOWN** is an accredited member of the **RIBA CPD Providers Network**. Which means our presentations count toward your professional development hours. Properly.

Our session — *Using Systemization to Create Scalable and Inspirational Ceilings and Facades* — covers material specification, technical compliance, sustainability, and how to take architectural intent all the way through to buildable, high-performing systems.

Structured. Useful. And it counts toward your 35 hours.

HOW YOUR CREDITS WORK

35

HRS / YEAR

Required annually for all practicing RIBA Chartered Members.

20

STRUCTURED HRS

Must cover the 10 RIBA Core Curriculum topics — at least 2 hours per topic.

45

MIN SESSION

One NOWN session — RIBA-assessed and recorded directly to your CPD log.

WHAT WE COVER

- **Materials — performance and specification**

Aluminium, PET Felt, and Knit — how they perform, how they're tested, and how to specify them correctly for ceiling and facade applications.

- **UK Building Regulations — structure, fire, and energy**

Compliance with Parts A, B, and L — structural integrity, fire classification (BS EN 13501-1), and thermal performance for bespoke ceiling and facade installations.

- **Sustainability — material health and life-cycle thinking**

EPDs, HPDs, recycled content, take-back schemes, and how to evaluate environmental performance beyond price or appearance. Relevant to BREEAM, LEED, and WELL projects.

- **Design to delivery — scalable systems and fabrication logic**

How conceptual ideas become buildable systems — from parametric modelling and modular fabrication through to installation, tolerance planning, and real-world project delivery.

Slides are shared with all attendees after the session — so you can focus on the conversation, not your notes.

Sessions are free and available in-person or online. **You bring the spirit. We bring the content — and the credits.**
